Call for Papers

HWCVD10 will take place in Kitakyushu, Fukuoka, JAPAN
in September 3-6, 2018

Conference topics of particular interest include:

A. Fundamentals – gas chemistry, surface chemistry, reaction mechanisms, catalysis, modeling, simulation

B. Processing – HWCVD, HFCVD, cat-CVD, iCVD, plasma-assisted HWCVD, hot wire-assisted ALD

C. Materials – silicon, carbon, metals, oxides, nitrides, polymers, organics, composites

D. Structures – thin films, coatings, multilayers, membranes, particles, powders, nanostructures

E. Applications – energy capture, energy storage, photovoltaics, batteries, electronics, optoelectronics, biotechnology, water treatment, barrier layers, surface modification)

F. Commercialization – scale up, technology transfer, industrial design, industrial systems

G. Other – emerging areas, new developments, novel approaches
